Time Schedule
of laboratory lessons on Pharmacology for 3rd year students of stomatological faculty
for autumn term of 2017 – 2018 academic year

Item N	Lesson Focus	Period
Module 2 (continued)		
1.	Drugs that affect the function of the digestive organs. Drugs affecting appetite and function of the gastric glands.	1.09. – 07.09.
2.	Drugs that affect the function of the digestive organs. Means, which influence on the function of the liver, gall bladder, Poggio ludochnoy prostate and bowel. Bile zasoby. Hepatic. Probiotics.	8.09. – 14.09.
3.	Medicines affecting the blood clotting system and fibrinolysis. Antiplatelet agents.	15.09. – 21.09.
4.	Means, which influence on the blood. Antitumor and immunotropic medicines.	22.09.– 28.09.
5.	Vitamins (membranotropic, coenzyme action).Antivitamin.	29.09. – 05.10.
6.	Hormones (peptide), their synthetic analogs and antagonists.	6.10. – 12.10.
7.	Hormones (steroids), their synthetic analogs and antagonists.	13.10. – 19.10.
8.	Preparations of calcium salts. For the treatment and prevention of osteoporosis. Plasma expanders. Crystalloids. Enzyme drugs. That anti-allergy medicines.	20.10. – 26.10.
9.	Mastering control module 2.	27.10. – 02.11.
Module 3		
10.	Antiseptics and disinfectants.	3.11. – 09.11.
11.	Sulfonamides and synthetic antimicrobial drugs with different chemical structure.	10.11. – 16.11.
12.	Pharmacology of antibiotics. Antimycobacterial drugs. Antispirochetal drugs.	17.11. – 23.11.
13.	Principles of rational combination of antibiotics. Side effects of antibiotics and how to preventit.	24.11. – 30.11.
14.	Antituberculosis drugs. Antiviral agents.	1.12 – 07.12.
15.	Protivoprotozoynoe funds. Worming agent.	8.12 – 14.12.
16.	Preparations of acid, alkali and alkaline earth metal salts. Glucose.	15.12 – 21.12.
17.	The principles of treatment of acute poisoning. Antidotes. Mastering control module 3.	22.12. – 28.12.
